

Western Journal of Emergency Medicine's Journal Ranking and Impact Factor July 2020

Dear *WestJEM* community,

We are proud to share the latest news regarding the journal's ranking for July 2020:

- [Clarivate Analytics](#) (previously known as Thomson Reuters) provided an inaugural 2-year Impact Factor of 1.807, which ranks 14/31 worldwide (6th among EM specific journals).
- *WestJEM* now ranks 16/87 worldwide (6th among EM specific journals) per the newly released [SCImago Journal Rank](#) (SJR) index.
- [Scopus CiteScore ranks](#) *WestJEM* at 22/75 (9th among EM specific journals) with a corresponding CiteScore of 2.6.

Published by the Department of Emergenc Medicine at the University of California, Irvine, *WestJEM* is one of a few fully Open Access EM journals, making its content freely available around the world immediately upon publication.

These place *WestJEM* as the 2nd or 3rd ranked Open Access general EM journal in the world.

WestJEM focuses on the integration of population health with emergency care. The journal is indexed in all major medical databases including MEDLINE, PubMed, Pubmed Central, and Clarivate Science Citation Index Expanded. *WestJEM*'s companion journal, Clinical Practice and Cases in Emergency Medicine, [CPC-EM](#), has also grown with indexing through PubMed and PubMed Central.

Our authors, senior editors, section editors, editorial board, and sponsors are all critical to the journal's success. We sincerely thank the entire *WestJEM* community for its continued support.

Best regards,

Mark I. Langdorf, MD, MHPE, FAAEM, FACEP, RDMS
Editor in Chief, *WestJEM*
